PRITHIVIRAJ B

Full-Stack Developer / Web Developer

prithivirajb26@gmail.com- 7339044516 - LinkedIn - Github

Professional Summary

Final-year Computer Science and Engineering student with hands-on experience in full-stack web development and ASP.NET MVC application development. Skilled in React.js, Node.js, Express.js, MySQL, and REST APIs, with project experience in inventory management, examination seating automation, and machine learning-based sentiment analysis. Familiar with database management, version control using Git, and developing web applications to solve practical problems. Seeking an entry-level Full-Stack Developer or Software Developer role.

Education

B.E - Computer Science and Engineering 2023 - 2027 CGPA - 7.74

Kumaraguru College of Technology

Higher Secondary Education 2019 – 2023 Percentage – 93.67%

Little Flower Matric Higher Secondary School

Technical Skills

Programming Languages: Java, JavaScript, Python, C

Development: React.js**,** Node.js, Express.js, ASP.NET MVC, REST APIs

Databases: MySQL, MongoDB

Developer Tools: Git, GitHub, Firebase, AWS, Microsoft Azure, Docker

Fundamentals: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Operating Systems, Computer Networks.

Projects

Merchant Mind — Inventory Management System

Tech Stack: *React.js, Node.js, Express.js, MySQL*

- Developed a full-stack inventory management application to track product availability, manage stock levels, and handle orders.
- Implemented backend functionality using Node.js and Express.js to support inventory-related operations.
- Used MySQL to store and manage inventory and order data.
- Implemented low-stock notification functionality to help identify products requiring replenishment.

Hallora — Examination Seating Management System

Tech Stack: *React.js, Node.js, Express.js, MySQL*

- Designed and developed a web-based examination seating management system to automate student seat allocation and examination hall assignment.
- Implemented seating allocation functionality to generate arrangements for 500+ students.
- Used MySQL to manage examination-related data and support database operations.
- Developed the application using React.js for the frontend and Node.js with Express.js for backend functionality.

SentiSense — Sentiment Analysis System

Tech Stack: *Python, Flask, React.js, Hugging Face Tokenizers, Scikit-learn*

- Developed a sentiment analysis application to classify user-submitted text as positive or negative.
- Combined TF-IDF and Byte Pair Encoding (BPE) features for text representation.
- Implemented Logistic Regression for sentiment classification.
- Built a Flask backend and React.js interface to process text input and display predictions, confidence scores, and influential keywords.

Internship

Junior Web Developer Intern | Wander With Food | BINI

July 2025 – January 2026

- Developed new webpages and integrated them into an ongoing web application using ASP.NET MVC and C#.
- Worked with SQL queries and database integration to support application functionality.
- Performed application testing, identified bugs and errors, and reported issues for resolution.
- Collaborated with developers using Git to integrate code from different modules and improve code quality.

Certifications

- Machine Learning Techniques – Coursera (2026)
- AWS Academy Graduate – Cloud Foundations (2025)
- Algorithmic Thinking – Rice University (2024)

Additional Information

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Adaptive Learning, Technical Communication

Languages: English - Fluent, Tamil – Fluent, Hindi – Basics.

Interests: Full-Stack Development, Emerging Technologies.
